AUTOMATION TEST ENGINEER — 4 YEARS

Automation Test Engineer with 4+ years of experience designing and building scalable UI and API automation frameworks using Java, Selenium, Rest Assured, and Playwright. Automated 500+ test cases across web and API layers, reducing regression execution time by 70% and enabling faster releases through CI/CD integration. Strong experience in BDD frameworks, parallel execution, and end-to-end automation strategy for enterprise applications.

TECHNICAL SKILLS

Languages: Java, JavaScript, Typescript

UI Automation: Selenium WebDriver, Playwright

API Automation: Rest Assured, Postman

Frameworks: TestNG, Cucumber BDD, Mocha

Architecture: Page Object Model, Hybrid Framework, Data-Driven Framework

CI/CD: Jenkins pipeline integration

Build Tools: Maven

Tools: Git, Jira, Zephyr, Kibana, splunk

Testing: UI, API, Regression, Cross-browser

Execution: Parallel execution, BDD, data-driven testing

PROFESSIONAL EXPERIENCE

Quality Engineer L2 – Publicis Sapient

July 2025 – Present

Hyderabad

- Designed and implemented Playwright + Cucumber automation framework from scratch for regression and sanity suites.
- Automated critical Verizon digital sales journeys including cart, checkout, device purchase, and plan selection.
- Integrated automation suite with Jenkins CI/CD pipeline for scheduled and on-demand execution.
- Reduced manual regression effort by 50% through automation coverage expansion.
- Performed API validations using Postman and backend verification using Kibana logs.
- Defined automation strategy for weekly releases and regression stability.

Automation Test Engineer – Cognizant Technology Solutions

May 2022 – July 2025

Hyderabad

- Built Selenium + TestNG hybrid automation framework from scratch using Page Object Model and data-driven design.
- Automated 500+ UI and API test cases covering regression, smoke, and integration scenarios.
- Developed REST API automation suite using Rest Assured for core business workflows.
- Implemented parallel execution across browsers reducing execution time by 50%.
- Integrated automation suite with Jenkins pipeline for CI/CD execution on deployments.
- Reduced regression cycle from 2 days to under 1 day using automation and parallel runs.
- Contributed to automation strategy, framework design improvements, and reusable utilities.

PROJECT EXPERIENCE

Verizon Digital Sales Platform

- Developed Playwright automation suite for end-to-end web purchase flows and user journeys.
- Implemented reusable utilities and modular test architecture for stability.
- Enabled weekly automated regression runs for release validation.
- Performed API and backend validation using Postman and Kibana logs.

US Bank Wealth Management

- Developed a data-driven API automation framework using **Java, Rest Assured, TestNG, and Cucumber BDD** for scalable and maintainable test automation.
- Automated and validated **100+ RESTful APIs** across **monolithic and microservices architectures**, ensuring functional and integration reliability.
- Designed and implemented **BDD test scenarios and step definitions** to improve test readability and collaboration with cross-functional teams.
- Automated critical service workflows and integrated automated test execution into **CI/CD pipelines** to enable continuous testing.
- Reduced manual regression testing effort and improved test execution efficiency through robust automation coverage and reusable framework components.

US Bank Lending Application

- Developed Selenium-Cucumber automation scripts for core lending workflows.
- Debugged failing test cases and stabilized flaky automation scripts.
- Enhanced framework utilities by adding reusable methods for common actions.
- Executed automated regression suites across multiple releases.
- Collaborated with framework owners to improve the maintainability of automation code.

KEY ACHIEVEMENTS

- Automated 500+ test cases across UI and API layers.
- Reduced regression effort by 70%.
- Built automation frameworks from scratch using Selenium and Playwright.
- Integrated automation into CI/CD pipelines for continuous testing.

EDUCATION

B.Tech – Mechanical Engineering

Vel Tech University

CERTIFICATION

Microsoft Azure Fundamentals (AZ-900)
